CULTIVATE YOUR AWARENESS FREE YOUR LIFE

Experience a profound **mingjue healing** experience, connection, balance, and inner expansion at our upcoming Qi Science retreat, Zhineng Qigong, with Teacher Wei Qifeng.

Since 2023, we have been holding international retreats in an atmosphere of joy, depth, and harmony. Over the course of eight days, we will focus on a topic that is essential to our lives: using mindful observation to deactivate the thought patterns that bind us to suffering.

The retreat will take place in the peaceful and beautiful surroundings of Casa Don Bosco, near the city of Valencia. A natural and austere space ideal for practice, rest, and inner reflection.

Before the retreat begins, there will be a special day for teachers who teach Zhineng Qigong.

A powerful proposal

The retreat is open to everyone. Whether you are a beginner or have been practicing for years, you will receive clear and well-structured teachings in a series of simple yet profound practices that will lead you to:

- **connect** with your clear consciousness and live in the present
- **calm** your emotions, free yourself from stress
- **relax** deeply and find your inner balance
- **open the heart**, heal the relationship with yourself, others, and the world
- **improve** body movement and flexibility
- **play** with qi to increase and smooth your life energy
- **gain** courage, joy, strength, team spirit, and self-confidence

Classes are taught in English with translation into Spanish and other languages.

The focus of the retreat: cultivating awareness

Neuroscience shows that what we think creates emotions that affect the body. If the emotion is dense or heavy, the body tenses up. If the situation persists, energy stagnates and we can become ill.

Cultivating awareness is practicing self-aware observation. It means becoming aware of how your internal state influences your nervous system and the vibration of your energy.

It's about reconnecting mind and body to allow your energy to reorganise and regain its natural wisdom and harmony.

It's about learning to observe which psycho-emotional patterns sustain your suffering, accepting them as part of your human heritage, and transforming them.

It's about rediscovering play, smiling in the face of difficulties. It's about training your attention, breath, and energy to create a healthy life.

Cultivating a stable and clear consciousness allows the heart to relax, open, and reveal its authentic nature.

We will pay special attention to

1- ATTITUDE - Attitude is crucial for changing your life. Practicing inner smiles, joy qigong, play, walks in nature, singing, or dancing makes us more open and flexible.

2- THE BODY - Alternate movement and stillness, experiencing the qi body and its four major centers. Incorporate breath and sound; practice mantras. Strengthen the qi of the spine and nervous system by: awakening the qi dragon, activating the swimming dragon, experiencing the flying dragon, and further enjoying the dancing dragon. Promote the abundance and free flow of bodily qi by stretching and becoming aware of the body's twelve energy channels, using the movements of the double spiral Taiji. And more...

3- THE FIELD - Facilitating the harmonious transformation of all through the creation of a high-frequency group and global field, with the best information. Group practice and group consciousness, fundamental to this teaching, will support the individual and collective process.

4- AWAKENING AND MAINTAINING CONSCIOUS CLARITY, MINGJUE, is the foundation for naturally transforming your entire life.

It will be eight days of calm, depth, lightness, play, inner connection and peaceful exchange.
